

**Alfa Laval Nordic in a nutshell.**

Alfa Laval Nordic is the sales and service organisation for Alfa Laval products and solutions in the Nordic region. 260 employees in 7 regional offices and more than 20 local offices generate a total turn-over of 175 million (2005).

Repair and service centers for heat exchangers are located in Lund (Sweden) and Humpilla (Finland) – and for separator equipment in Tumba (Sweden) and Vejen (Denmark).

Your separator's best friends.

Alfa Laval's Service Center in Tumba, Sweden.

# Breathing new life into your Alfa Laval separator.

Welcome to Tumba and Alfa Laval's Service Center for Northern Europe.

Here, our team of specialized engineers and technicians are making it their business to support your business – by giving your separator equipment all the attention and care it needs.

They'll maintain it, repair it, refurbish it and upgrade it – all in order to ensure the reliable and efficient operation that you've come to expect from Alfa Laval. They also perform adaptations of new equipment to meet particular customer requirements.

The 20 staff in the Tumba Service Center have all received special training for their tasks. Their skills and experience, combined with a top-notch workshop facility and the most modern tools and machinery, are your guarantee for high-quality services and fast turnaround.

The Tumba Service Center started modestly back in 1976. Today, it conducts a total of 130 advanced repair/refurbish projects each year – for customers based throughout the Nordic, Baltic and Benelux regions, as well as in Germany and France. To cope with this expansion, the premises have grown to nearly 3,000 sqm of workshop and warehouse space.

The location in Tumba, south of Stockholm, is convenient for road, rail and air transports.

## An efficient process for effective service.

When your equipment goes to Tumba (for example to receive a mid-life overhaul), we take it through a well-defined step-by-step action process. All steps are carefully scheduled and coordinated, to secure a speedy overall turnaround.
