

Schoolteacher.

If he doesn't look like a run-of-the-mill driving teacher, that's because he isn't.

Just like Scania Driver Training is no run-of-the-mill driving school.

The reason is simple. Many experienced drivers like you believe they have nothing further to learn. And that formal training is boring anyway.

Our training program needs to prove them wrong – on both counts.

Consequently, no matter how long you've been driving professionally, we guarantee you a few major revelations.

Don't be surprised, for example, if you come back with a whole new driving style. One that saves fuel, reduces global warming and makes the road a safer place. While giving you a more pleasant time behind the wheel.

And don't doubt that sense of satisfaction once your

training is completed.

Scania Driver Training is much more than mere education – it's an experience. It's hands-on, immensely interactive and loads of fun. You learn from the topmost Scania experts and get to pick their brains all you want.

Our philosophy is simple: learning by doing, while having a good time. So if you like Scania trucks and buses, you'll enjoy the Scania training.

And simply love the teacher.

**Scania Driver Training.** Dedicated all the way. Great training for great drivers.
