

Schoolyard.

If this doesn't look like your average schoolyard, that's because it isn't.

Just like Scania Driver Training is no average school.

Experienced drivers like you may come to us thinking they already know all there is to know. And that formal training is a boring waste of time.

Well, guess what – we consistently prove them wrong. On both counts.

Among the revelations we can guarantee you is a whole new way to drive. Not a slower and duller way – but more attentive, more active and premeditated. And less forceful.

It's a driving style that saves fuel, reduces global warming and makes the road a safer place. While giving you a more pleasant time behind the wheel.

Scania Driver Training is much more than mere

education – it's an experience, a way of life. It's hands-on, immensely interactive and loads of fun. You learn from the topmost Scania experts and get to pick their brains all you want.

Our philosophy is simple: learning by doing, while having a good time. So if you like Scania trucks and buses, you'll enjoy the Scania training.

And simply love the school grounds.

**Scania Driver Training.** Dedicated all the way. Great training for great drivers.
